# The Future of Risk

April 10-12, 2019 | Chicago

#TIFutureofRisk

# ANTITRUST STATEMENT

During this event, we intend to comply in all respects with federal, state and international antitrust laws. These laws forbid agreements among competitors in the marketplace that restrict a company's freedom to make independent decisions in matters affecting competition.

Participants may neither discuss nor field questions about any matters relating to individual company rates, underwriting, coverages or marketing.

We will not discuss:

- Present or future prices of products or services
- Present or future sales terms and conditions
- Treatment of any customer
- Present or future business strategies or marketing plans
- Refusal to deal with any customer, competitor or supplier

Machine learning, Neural networks, Skynet!  
How do you define AI?

What are the main benefits?  
What types of new business models will emerge  
Where are the risks for all stakeholders?  
What to do next week and next month?

# Security

Privacy, Protection of Digital Assets, Ethics, Regulation  
How do you define Security?

What are the main benefits?  
What types of new business models will emerge  
Where are the risks for all stakeholders?  
What to do next week and next month?

# Internet of Things

Sensors, RFID, GPS, Connected everything  
How do you define Internet of Things?

What are the main benefits?  
What types of new business models will emerge  
Where are the risks for all stakeholders?  
What to do next week and next month?

# Quantum Computing

Unlimited computing power, End of encryption, non-human brain?  
How do you define Quantum Computing?

What are the main benefits?  
What types of new business models will emerge  
Where are the risks for all stakeholders?  
What to do next week and next month?

**B**lockchain  
**A**rtificial Intelligence  
**S**ecurity  
**I**nternet of Things  
**Q**uantum Computing

What are the biggest opportunities and risks when these technologies are combined?
